PROFESSIONAL SUMMARY

Motivated Computer Science student and self-driven Full-Stack Developer with hands-on experience building responsive, user-friendly web applications using React, Next.js, Node.js, and MongoDB. Passionate about clean UI, component-based architecture, modern authentication, and shipping production-ready full-stack applications. Actively seeking remote opportunities to contribute and grow within a product-focused team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Next.js 15 (App Router), React Router, Context API, Express.js

Styling: Tailwind CSS, shadcn/ui, DaisyUI, Framer Motion

Authentication: Better Auth, MongoDB Adapter, Google OAuth, JWT

Database: MongoDB Atlas (Native Driver)

Tools & Libraries: React Query, Axios, Recharts, Lucide React, React Icons, Git, GitHub

Currently Learning: Advanced Full-stack patterns, REST API design, Deployment strategies

PROJECTS

IdeaVault — Startup Idea Sharing Platform

Tech Stack: Next.js, Tailwind CSS, shadcn/ui, Framer Motion, Node.js, Express.js, MongoDB Atlas, BetterAuth, JWT | [GitHub](#) | [Live](#)

- Built a full-stack platform where users can submit, browse, update, and delete startup ideas with full CRUD functionality
- Implemented secure authentication with Email/Password and Google OAuth using BetterAuth with JWT-based session verification
- Developed search by title (case-insensitive regex), filter by category, comment system, and bookmark system
- Built user dashboard pages: My Ideas, My Interactions, and My Bookmarks with real-time toast notifications

QurbaniHat — Livestock Booking Platform

Tech Stack: Next.js 16, Tailwind CSS, Better Auth, MongoDB Atlas, React Spring, Lottie, Animate.css | [GitHub](#) | [Live](#)

- Built a full-stack livestock booking platform where users browse animals by type, view details, and place bookings after authentication
- Implemented Email/password and Google OAuth login, profile update functionality, and card animations with React Spring
- Integrated Lottie cow mascot as a loading screen and toast notifications with Animate.css; fully responsive and deployed on Vercel

KeenKeeper — Friendship Tracker Web App

Tech Stack: Next.js, React.js, Tailwind CSS, DaisyUI, Recharts, Lucide React, Sonner | [GitHub](#) | [Live](#)

- Built a responsive friendship tracker app to help users stay connected, log interactions, and visualize communication patterns
- Implemented chronological timeline, interaction filtering by type (call/text/video), and Recharts-based custom pie chart

EDUCATION

Bachelor of Computer Science 2024 – Expected 2028

Northeast Petroleum University, Daqing, China

EXPERIENCE

Aspire Leadership Program 2024

- Participated in structured leadership development activities with cross-functional teams
- Strengthened teamwork, communication, and problem-solving skills in collaborative settings
